

# Central Oil Supply System

Designed as a simple and practical oil supply system for single or multiple burners located in suspended heating equipment.

**Simple:** pumping is direct, no bypass, stand pipes or regulating valves. Makes troubleshooting easy.

**Inexpensive:** the system is complete with all fittings needed for fast, neat installations.

**Easy to Maintain:** all components available individually as replacement parts.

**P239-1M** Central Oil Supply System complete, up to 24 gph

### Replacement Parts
