COLD-ALERT

Telephone Monitoring System

Item# C138-4M

Now a simple call home helps prevent plumbing freeze-ups!
While you're away COLD-ALERT stands guard in your home. Just call home, if your phone rings your heat is on. If you get a persistent busy signal, the COLD-ALERT has sensed a significant temperature drop in your home.

EASY TO INSTALL
SECONDARY JACK
CONVENIENT

Simply plug into your existing modular phone jack.
Allows you to use your phone while COLD-ALERT is operating.
Call anytime to see if your heat is working. No need to depend on friends or neighbors - just call home.

ECONOMICAL
DEPENDABLE

A simple call home helps prevent expensive plumbing repairs.
Simple fool-proof design gives long lasting service.

CAUTION: Cannot be used on party lines, call waiting or any line that does not give a busy signal when the receiver is off the hook.
