

Everyone complains about the quality of today's heating oils...

And now Mitco is doing something about it!

*Introducing our NEW Dual Oil Filtration System*

# MICRO-KLEEN

- Unique dual filter design provides superior filtration with extended element life to keep nozzles clean.
- Oil is first filtered through our revolutionary Micro-Flow fiber with a 50 micron filter rating. It then passes through the 10 micron secondary Spin-On filter, leaving it virtually contaminant free.
- Installing the Micro-Kleen Dual Oil Filtration System is easy for both new and after market equipment.
- Proper maintenance of the Micro-Kleen Dual Oil Filtration System is assured by using the optional vacuum gauge. The service tech can easily monitor any increase in vacuum indicating that the filter elements need changing.

Micro-Kleen Dual Oil Filtration System#	Primary Filter @50 microns	Secondary Filter @ 10 microns	Complete with Vacuum Gauge	Size
264-290M	264M Micro-Flow, 15 gph	290M Spin-On, 40 gph	No	3/8"
264-290FM	264M Micro-Flow, 15 gph	290M Spin-On, 40 gph	Yes	3/8"
265-292-2M	265M Micro-Flow, 30 gph	292-2M Spin-On, 40 gph	No	3/8"
265-292-2FM	265M Micro-Flow, 30 gph	292-2M Spin-On, 40 gph	Yes	3/8"
